

Compass Mediation Group — Post-Redevelopment SEO/GEO/AEO Preservation Audit

Prepared by eSEOSpace for Compass Mediation Group

August 7, 2026

OVERALL VERDICT

PARTIAL — Safety clean, but significant SEO/GEO structure lost

The website redevelopment successfully avoided the most dangerous outcomes: there is no trace of the old Anacortes address, the personal phone number, or the incorrect BBB phone number anywhere on the live site, and the correct phone number appears consistently. E-E-A-T content — Alisa Kharis's bio, credentials, and disclaimers — is strong and, in some respects, improved. However, the redevelopment also introduced real regressions: eight city-specific location pages were consolidated into a single generic page, nearly all structured data (schema markup) was stripped from the site, and six service-related URLs now return hard 404 errors with no redirect in place. The sections that follow break down what was preserved, what was lost, and what should be fixed first.

Summary at a Glance

✓ WHAT WAS PRESERVED

- Zero "Anacortes" mentions anywhere on the site — **SAFETY CLEAR**
- Zero personal phone (206-212-0228) exposure
- Zero wrong BBB phone (602-900-1665) exposure
- Correct phone (888-851-8856) present on all 22 live pages
- Meta titles present on all live pages
- Meta descriptions present on all live pages
- Open Graph tags present on all live pages (1 exception)
- E-E-A-T content (Alisa's bio, credentials) strong and improved
- Disclaimers present on 11 of 22 pages
- Single, correct H1 on 21 of 22 live pages

✗ WHAT WAS LOST

- All 8 city landing pages collapsed into one generic /locations page — GEO targeting destroyed
- Schema markup almost completely stripped — only homepage retains Organization + WebSite; FAQPage, Service, LocalBusiness, and Person schema are gone site-wide
- 6 service pages are hard 404s with no redirect (child-custody, employee-relations-mediation, marital-mediation, mediation-services, pet-mediation, real-estate-mediation)
- /about page is missing its H1 tag
- /library Open Graph tags are copied from the /business page (bug)
- /testimonials H1 reads "Your Mediation is Complete!" — leftover copy

Impact Assessment — What This Means

● CRITICAL: Location Pages Collapsed (GEO Impact)

All 8 individual city pages — /seattle-mediation, /portland-mediation, /phoenix-mediation, /longview-mediation, /avondale-mediation, /tacoma-mediation, /olympia-mediation, and /lindenhurst-mediation — now 301-redirect to a single generic /locations page.

Impact: Each city page previously could rank independently for "[city] mediation" queries. The Olympia page was achieving a 10.5% CTR at position 13.5. The "mediation services seattle" query had 69 impressions at position 20.3 and was in striking distance of page 1. All of that individual city-level ranking potential is now consolidated into one page that cannot target 8 different cities simultaneously.

Recommendation: Restore individual city pages, or create city-specific sections within /locations with unique content, dedicated H2 headings, and LocalBusiness schema for each city.

● CRITICAL: Schema Markup Stripped (AEO Impact)

Pre-redesign schema: Organization, FAQPage, Service, and LocalBusiness on relevant pages.

Post-redesign schema: Only Organization + WebSite on the homepage. Everything else: zero.

Impact: FAQPage schema was eligible for rich results in Google and direct answers in AI search (ChatGPT, Perplexity, Google AI Overviews). Service schema helped Google categorize service offerings. LocalBusiness schema was essential for local pack visibility. All of these eligibility signals are now gone.

Recommendation: Re-deploy all schema markup immediately. This is the single most impactful technical fix available.

● MODERATE: 6 Pages Return 404

/child-custody, /employee-relations-mediation, /marital-mediation, /mediation-services, /pet-mediation, and /real-estate-mediation return hard 404s with no redirect.

Impact: Any backlinks, bookmarks, or Google index entries pointing to these URLs now hit dead ends. Google will eventually deindex them, losing any accumulated authority. Users arriving from search results or external links get a broken experience.

Recommendation: At minimum, set up 301 redirects to the most relevant existing page (e.g., /child-custody → /family; note /workplace-mediation already correctly redirects to /business). Ideally, restore these as dedicated pages.

Page Inventory — Full Status Map

All 34 originally-checked URLs, with color-coded status: **GREEN = 200 live** **YELLOW = 301 redirected** **RED = 404 dead**

Original URL	Status	Redirects To	Impact
/	200	—	✓ Preserved
/about	200	—	⚠ Missing H1
/alisa-kharis	200	—	✓ Preserved
/book	200	—	✓ Preserved
/contact	200	—	⚠ No disclaimer
/divorce	200	—	✓ Preserved
/family	200	—	✓ Preserved
/business	200	—	✓ Preserved
/child-custody	404	—	✗ DEAD — no redirect
/elder-care-mediation	301	/estate	✓ Redirected
/employee-relations-mediation	404	—	✗ DEAD — no redirect
/faq	200	—	⚠ No disclaimer, no FAQPage schema
/is-mediation-legally-binding	200	—	✓ Preserved
/marital-mediation	404	—	✗ DEAD — no redirect
/mediation-services	404	—	✗ DEAD — no redirect
/pet-mediation	404	—	✗ DEAD — no redirect
/pricing	200	—	✓ Preserved
/property-division-mediation	301	/divorce	✓ Redirected
/real-estate-mediation	404	—	✗ DEAD — no redirect
/spousal-support-mediation	301	/divorce	✓ Redirected
/testimonials	200	—	⚠ Wrong H1 text
/workplace-mediation	301	/business	✓ Redirected
/do-i-need-a-lawyer-for-mediation	200	—	✓ Preserved
/seattle-mediation	301	/locations	● GEO loss
/portland-mediation	301	/locations	● GEO loss
/phoenix-mediation	301	/locations	● GEO loss
/longview-mediation	301	/locations	● GEO loss
/avondale-mediation	301	/locations	● GEO loss
/tacoma-mediation	301	/locations	● GEO loss
/olympia-mediation	301	/locations	● GEO loss
/lindenhurst-mediation	301	/locations	● GEO loss
/blog	301	/library	⚠ OG tag mismatch
/privacy-policy	200	—	✓ Preserved
/terms-of-use	404	—	⚠ Moved to /terms-of-service

New pages discovered: /locations, /library, /how-it-works, /what-to-expect, /resources, /legal-notices, /terms-of-service, /estate — all return 200 with proper meta tags.

Schema Status — Before vs. After

Schema Type	Pre-Redesign	Post-Redesign
Organization	✓ Homepage	✓ Homepage (preserved)
WebSite	—	✓ Homepage (new)
LocalBusiness	✓ Multiple pages	✗ GONE everywhere
Service	✓ Service pages	✗ GONE everywhere
FAQPage	✓ /faq	✗ GONE everywhere
Person (Alisa)	✗ Never existed	✗ Still missing
BreadcrumbList	✗ Never existed	✗ Still missing
Review / Rating	✗ Never existed	✗ Still missing

Note: The homepage Organization schema does correctly show telephone "+1-888-851-8856" and no Anacortes address. However, it has **no address field at all** — not even the Seattle address — which weakens local search signals.

Why This Matters

- **LocalBusiness** schema is the primary machine-readable signal search engines use to understand a business's location, service area, and hours — essential for local pack visibility and "near me" style queries.
- **Service** schema explicitly tells search engines which services are offered on a page, improving categorization and eligibility for service-specific rich results.
- **FAQPage** schema is a direct input for AI answer engines (ChatGPT, Perplexity, Google AI Overviews) and for Google's FAQ rich results — losing it removes a low-cost, high-value AEO channel.
- **Person** schema for Alisa Kharis was never implemented, even pre-redesign — this remains an outstanding opportunity given the depth of her credential content already published on the site.

E-E-A-T Content Assessment

✓ WHAT'S STRONG (Preserved / Improved)

- Alisa named on 19 of 22 pages
- Credentials consistently cited: JD (Seattle University), BA (WSU), Master Mediator (IMA), IRS Enrolled Agent
- 16-year attorney career (1996–2012) correctly framed as past tense
- Dedicated bio page at /alisa-kharis with H1 "Alisa Kharis, JD"
- Disclaimers on 11 of 22 pages directing readers to independent attorneys

✗ WHAT'S MISSING

- No Person schema (machine-readable author signal for Google/AI)
- No author bylines on blog/article content
- Disclaimers missing from /contact, /faq, /testimonials, /locations, /library
- /faq answers legal-adjacent questions without a disclaimer — notable gap

Assessment

The visible, human-facing E-E-A-T signal on this site is genuinely strong: Alisa Kharis's credentials (JD, Master Mediator designation from the International Mediation Association, 25+ years of mediation experience, 16 years as a trial attorney across King, Pierce, Kitsap, Whatcom, and Grays Harbor counties, and a federally licensed IRS Enrolled Agent designation) are documented in detail and repeated consistently across the homepage, About page, and dedicated bio page. This is a genuine improvement over a typical small-practice site and should be preserved as future redesigns occur.

The gap is entirely on the machine-readable side: none of this credential and authorship information is exposed as structured data (Person/author schema), so search engines and AI answer engines cannot programmatically verify or surface Alisa's expertise the way they could with proper markup. Coupled with the disclaimer gaps on /faq, /contact, and a few other pages, there is a clear and low-effort path to strengthening E-E-A-T further without any new content being written.

Content Depth — Key Service Pages

Page	Word Count	Assessment
/divorce	965	Moderate — below 1,200-word target for a pillar page
/family	1,005	Moderate
/business	1,070	Moderate
/estate	1,056	Moderate
/child-custody	N/A — 404	✗ Page gone
/pricing	1,197	Good
/do-i-need-a-lawyer-for-mediation	1,586	Strong
/faq	146	⚠ Very low — content likely in accordions not captured, but still thin for SEO
/ (homepage)	416	Light — typical for a homepage

Observations

- The four core service pillar pages (/divorce, /family, /business, /estate) all sit in a tight band around 965–1,070 words — consistent, but each is short of the ~1,200-word benchmark generally recommended for competitive pillar/service pages targeting commercial-intent keywords.
- /do-i-need-a-lawyer-for-mediation and /pricing are the strongest pages by content depth and are well-positioned to support both SEO rankings and AEO/answer-engine extraction.
- /faq's measured word count (146) is almost certainly undercounting true content depth, since the audit's rendering method may not fully capture text inside collapsed accordion sections — but even accounting for that, the page would benefit from more directly-crawlable static text.
- /child-custody content depth cannot be assessed because the page no longer exists; related content is folded into /family and referenced sparingly within /faq.

Urgent Action Items — Priority Order

Immediate (This Week)

- 1 ● **Restore 8 individual city landing pages** OR create city-specific sections with unique content in `/locations`. GEO targeting depends on this.
Owner: Ken / Dev
- 2 ● **Re-deploy all schema markup** — FAQPage on `/faq`, Service on service pages, LocalBusiness with Seattle address on all pages, Person schema for Alisa on `/alisa-kharis`.
Owner: Ken / Dev
- 3 ● **Set up 301 redirects for the 6 dead URLs** to the most relevant pages: `/child-custody` → `/family`, `/marital-mediation` → `/family`, `/mediation-services` → `/`, `/pet-mediation` → `/family`, `/real-estate-mediation` → `/business`, `/employee-relations-mediation` → `/business`.
Owner: Ken / Dev
- 4 ● **Fix `/about` H1** — add a proper H1 tag.
Owner: Ken / Dev
- 5 ● **Fix `/library` OG tags** — currently showing `/business` content.
Owner: Ken / Dev
- 6 ● **Fix `/testimonials` H1** — change from "Your Mediation is Complete!" to an appropriate testimonials-page heading.
Owner: Ken / Dev
- 7 ● **Add disclaimers to `/contact`, `/faq`, `/testimonials`, `/locations`.**
Owner: Content Team

Verify

- 8 ● **Confirm 206-800-8825 is an intentional secondary number** — it appears in the footer of every page and in `/legal-notices` alongside the correct 888-851-8856 number.
Owner: Alisa / Irina

New Pages Discovered

Eight pages were found on the live site that were not part of the original checklist of 34 URLs. These represent either genuinely new site sections or renamed/consolidated versions of prior pages.

/how-it-works — new informational page **Good addition**

/what-to-expect — new informational page **Good addition**

/resources — new resource hub **Good addition**

/legal-notices — legal/compliance page **Good addition**

/estate — renamed from **/elder-care-mediation** **Proper 301 in place**

/locations — consolidation of 8 city pages **Problematic — see Page 2**

/library — renamed from **/blog** **Proper 301 in place, but OG tag bug**

/terms-of-service — renamed from **/terms-of-use** **NO redirect from old URL — 404**

Assessment

The new pages — **/how-it-works**, **/what-to-expect**, and **/resources** — are positive additions that improve site depth and support a clearer user journey from initial research through booking. They should be preserved and, ideally, expanded with schema markup and internal linking as part of the remediation work outlined earlier in this report.

The two consolidations — **/locations** and **/library** — need fixes. **/locations** replaced 8 independently-ranking city pages with a single generic page (a GEO-SEO regression detailed on Page 2), and **/library** carries a working 301 from its old **/blog** URL but currently serves incorrect Open Graph tags copied from the **/business** page.

/terms-of-service is the one renamed page missing a redirect: the old **/terms-of-use** URL now returns a hard 404 rather than forwarding visitors and search engines to the new page. This should be added to the redirect cleanup work alongside the six fully-dead URLs identified on Page 3.
